

PROJECT NINJA

For Technical Executives

THE OPPORTUNITY BRIDGE

THE VISIONARY SOLUTION

RESEARCH - DEMAND AND COMPETITION

PROJECT OVERVIEW (METRICS)

THE DECISION MAKER (VALIDATION)

OPPORTUNITY & BRIDGE

PROBLEM STATEMENT

The Present Organization A has performed an aggressive acquisition of another Organization B with 90k users which has a plethora of existing monitoring & dashboard tools which are spread across multiple domains and functions some of which overlap with each other. A new Ninja Command Center Agent will be created which needs to report to Executive C Suite Decision Makers who need a single pane of glass view to avoid any telemetry inconsistency & align with clear technical strategy.

PRESENT CHALLENGES

- Siloed Intelligence reported on various dashboards.
- Reactive resilience seen due to multiple vendors & noise captured.
- Security Compliance & License Gaps.

VISIONARY SOLUTION

THE SOLUTION

- Siloed Intelligence reported on various dashboards
- Reactive resilience seen due to multiple vendors & noise captured
- Security Compliance & License Gaps.

PROS

- Proactive assimilation of Infrastructure
- Accelerated Reduction of Cloud Spend.

CONS

- Employee Shock
- Velocity of closing technical debt
- Domain Expert Loss

INPUT

- Siloed Intelligence reported on various dashboards
- Data Assimilation of Knowledge

MODEL

- Ninja Agent ingests Knowledge employs Neural Network to serve as Single source for Prompt response to Executive Leaders across B & A with NLP.

OUTPUT

- Risk Heatmap reports
- Week on Week Report for C Suite Leads
- Respond to technical queries

DEMAND AND COMPETITION

DEMAND

- Availability of Dashboards
- Ease of Access across cross domain Tools
- Simplified security & compliance process
- Domain Knowledge
- Showcasing zero downtime
- Avoiding Cost Spillage & Energy efficiency.
- AI OPS capability to manage un-predictable workload
- Vendor Management

COMPETITION

- This consists of Proprietary data assimilated across both companies with various NDA clauses linked with Cloud Providers.
- Integration Leader companies showcasing specialist platforms

PROJECT OVERVIEW

BUDGET

- Estimated between \$80k- \$120k borne by Finance Team looking after acquisition.

RISK

- Data Compliance & local geographical laws.
- Complexity of Tools, Dashboard & Domain Knowledge

TIMELINE

- ~4 months divided into key monthly milestones

TECHNOLOGY

- Neural Network to discover & understand dashboards with Deep Technical capability.
- Prompt Search Capability & evolving

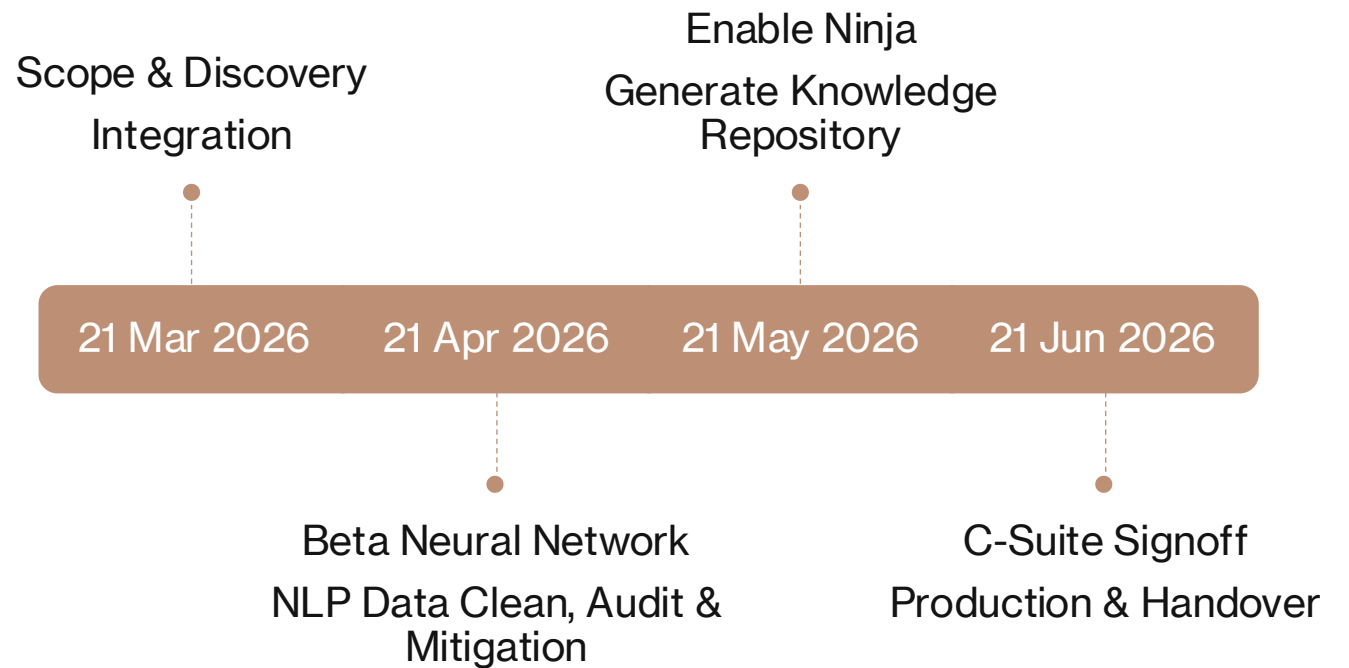

RESOURCE

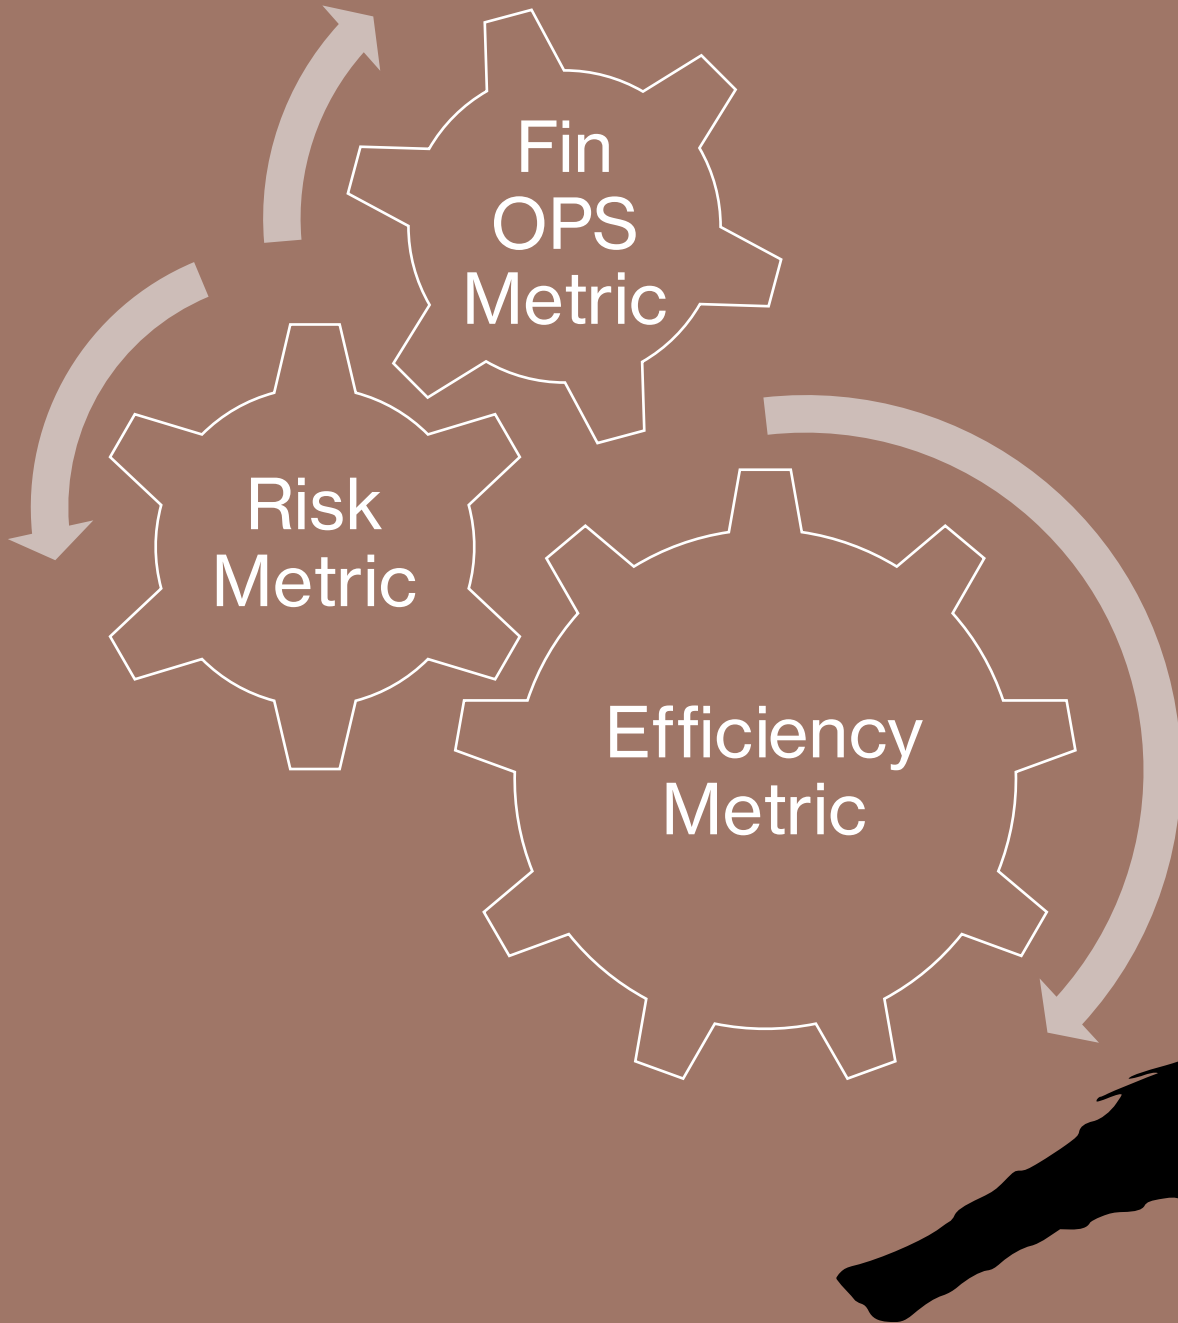

- 1 Program Manager
- 1 ML Architect
- 1 Chief Data Scientist
- 2 Tool Domain Experts from A & B.
- 1 Data Governance Expert
- 2 Data Engineers
- 1 Fin OPS Engineer
